Order from OTS or SLA \$1.60 61-19913

Trans. of Ukrainskiy Khimicheskiy Zhurnal (USSR)
1956, v. 22, no. 2, p. 239-246.

DESCRIPTORS: *Polarographic analysis, *Quality
control, Adsorption, Anesthetics, Food.

Adsorption polarography is shown to be applicable to
the problem of identifying the type or grade of a wide
variety of products of the foodstuff flavoring and the
pharmaceutical industries. In addition to the effect of
surface-active materials on the polarographic maxi-
mum, use may also be made of the retardation of the
electrode process which these materials exhibit. A
method capable of giving easily reproducible adsorption
polarograms, in phosphate solutions of copper, is
described. (Author)
